

Curricular Material Fee Update:

Our K-5 Curricular Material Fees have been adjusted for the 2022-2023 school year.

Math is now \$32.00 as we have just purchased a McGraw-Hill Reveal program for students that will be implemented over the next 6 years.

English Language Arts (ELA) was purchased over the last 3 years with no additional cost added to the Curricular fee as HCCSC felt it necessary to keep these fees low due to COVID and the effects that had on many of our families.

Science and Social Studies programs have also been used in the classrooms and HCCSC also eliminated that cost due to COVID.

Instructional Devices were able to decrease this year based off a ECF Grant that we received that help cover a portion of the devices that will be new to our K-5 students.

HCCSC needed to add Technology Applications fee for programs like Dreambox, Typingclub, and other applications that students use daily in class.

HCCSC will continue to try and keep cost low but with increasing cost for curricular items and digital services we will need to adjust in future years.
